ARCH-ROOFED BUILDINGS AT STORAGE SITE NEAR KRASNYY KUT AIRFIELD, USSR

A storage site containing 2 arch-roofed storage buildings is located at 44-32N 132-51E near the northeastern end of Krasnyy Kut Airfield approximately 1 nautical mile (nm) northeast of Krasnyy Kut, USSR (Figure 1). The site is about 90 nm north-northeast of Vladivostok and 26 nm from the China border. Both buildings have been constructed since

other building (Figures 2 and 3). The 2 partially revetted buildings were present in [REDACTED] and the other structures have been added since [REDACTED]. The arch-roofed buildings are situated in the northern part of the site. Installations in the vicinity of the site are listed in Table 1. A chronology of construction of buildings at the site is presented in Table 2.

A possible missile-related facility located approximately 1,700 feet west-southwest of the site is the subject of an earlier report. ¹ A housing and administration area is located approximately 700 feet northwest of the possible missile-related facility.

GENERAL DESCRIPTION OF SITE

The site is a small, well-secured installation containing 2 partially revetted storage buildings, 2 earth-covered arch-roofed buildings, and 1

Table 2. Chronology of Construction at the Storage Site near Krasnyy Kut Airfield, USSR

Date	Construction Status
25X1D	Two partially revetted storage bldgs observed in secured area No significant change since 25X1D Expansion of site underway; construction of eastern arch-roofed bldg possibly begun; excavation at future site of second arch-roofed bldg; excavation on south side of storage area at site of future construction Two arch-roofed bldgs completed, but not earth covered; loop road (for servicing both arch-roofed bldgs) under construction; bldg under construction in southern part of site Arch-roofed bldgs earth covered; loop service road completed, providing drive-through capability for arch-roofed bldgs; bldg in southern part of site apparently completed, has high section along north end Loop road cleared of snow; site probably operational

DESCRIPTION OF ARCH-ROOFED STORAGE BUILDINGS

The arch-roofed buildings measured 225 by 40 feet prior to earth covering, and are 355 feet apart (Figure 3). The nearest other structure is a partially revetted building which is located 190 feet from the northernmost arch-roofed building. The long axis of each arch-roofed building is aligned toward the entrance of the site. A loop road encircles both arch-roofed buildings and provides them with a drive-through capability. Photography of 25X1D revealed that snow had been removed from the roads, and that the main entrance is at the north end of the buildings. On the same photography, the clearing of snow from the service road also revealed the presence of wide-angle turns, which were probably constructed to facilitate movement of long vehicles into the buildings.
